

# Sewer Rehabilitation Along the 405

## Project Information

The Costa Mesa Sewer Rehabilitation Along the I-405 (Along the 405) Project will rehabilitate approximately 4 miles of the regional sewer pipeline that runs along the I-405 freeway in the City of Costa Mesa. The project will rehabilitate sewer pipelines, manhole structures, and improve access to manholes. The project also includes the rehabilitation of several sewer pipelines that cross under the freeway.

## Project Need

OC San is committed to protecting public health and the environment by proactively replacing and maintaining its infrastructure. The existing sewer line was constructed in the 1960s and needs to be rehabilitated and repair cracks in the pipe to extend its useful life for another 25-30 years and to continue providing reliable sewer service.

## Questions?

Call the Construction Hotline at **(714) 378-2965** or email [ConstructionHotline@ocsan.gov](mailto:ConstructionHotline@ocsan.gov).
